

VIDEO TRIBUTE

Guidelines for video:

1. In order to insure that the video is of a good quality, please submit only original photos to us. Photos which are scanned copies will appear grainy, and not as sharp or colorful as originals.
2. Need one photo for the cameo shot at the beginning and end. It is helpful if this photo is very good (preferably a studio type), and needs to be JUST the deceased in the photo if possible, as the company that produces the video is unable to crop out other people when they are near the deceased.
3. Need 16 additional photos, numbered 2 through 17.
4. If it will not be clear to us which person in the photo is the deceased, please put a note describing which person they are.
5. We cannot scan a photo larger than 8x10.
6. The video quality will be better if photos are square-ish rather than very long or very wide.
7. Please remove all pictures from frames. This will help us avoid accidental breaking of your frames.

Pictures must be at the funeral home by 1:00pm in order to have a video ready for visitation on the following day.

Rest Haven will have the video produced and will play it during visitation at no charge. If the family wishes to purchase the video, the price is \$150 for the first copy. Additional copies are \$35 each. Please allow one week for the additional copies to be ready.
